PRONUNCIATION PRACTICE / TEST INSTRUCTIONS

You need a microphone for this.

(You need to practice a little every day for at least a week before testing)

1. From inside your RS program, click on the settings button (left button on bottom right).
2. Click on the “red man” / “User Options” if the screen doesn’t go there automatically.
3. Click on “Log Out”
4. When the Menu opens, choose your favorite **old** lesson from the quarter’s assigned unit and click on it.
5. Click “Skill D” (picture of microphone).
6. Click on “Exercise 1”

7. GO!!!! Listen to the voice and then repeat exactly what you heard.

8. Keep recording over again until your voice print is similar enough to get the color meter to at least touch the green (all the way to the top of the meter is the best).

9. Go to the next screen and practice all 40 pictures. Choose your best 10 pictures from the **same** lesson. If none of them are getting in the green, try a different lesson (from the same unit).

10. Write down which are your best pictures. Then check and be sure each picture you’re choosing for the test...
 - is from that quarter’s assigned unit
 - has 2 words or more
 - doesn’t repeat ANY vocabulary (other than in/definite articles and pronouns)

11. Prepare to be tested and write down which screens and which pictures you want to be tested on. You must go in order from screen 1->10.

12. Ask Frau Doktor Bogard to come and score your pronunciation (1 try at each photo). You may test one more time if you don’t pass the first time.

Viel Glück!
